July 31, 2024

Dear Healthcare Providers,

August is National Immunization Awareness Month, and you are a valuable part of assuring vaccine coverage in Scott County! Current research shows that healthcare professionals are the ones parents trust and will go to with vaccine questions. To assist you with these conversations, the CDC has developed the framework below with conversational techniques for helping parents choose vaccines for their children.

If needed, you can refer patients who are eligible for the [Vaccines for Children \(VFC\)](https://www.cdc.gov/vaccines) program to the Scott County Health Department! For more resources to help promote immunizations in your practice, visit: <https://www.cdc.gov/vaccines>.

Thank you for your partnership in keeping our community strong!

Scott County Health Department Immunization Team
