

Meet Our Dental Staff

Scott County Health Department employs experienced dental hygienists that offer services through public health supervision with their dentists through the I-Smile programs. These include dental screenings, risk assessments, fluoride varnish, silver diamine fluoride, education, and radiographs (x-rays).

Radiographs provided by the hygienists are evaluated by their supervising dentist or other Iowa-licensed dentist. If you need to find your record or talk with staff, we are happy to help. Please call I-Smile at 563-328-4114.
