

## About the program

Over 52% of motorcycle crashes will result in serious injury or fatality. EMS providers must be prepared to assess the crash scene, prevent rescuer injury and assess and treat the injured rider. Are you prepared to manage motorcycle trauma? Is your service ready to respond to motorcycle crashes?

The Two Wheel Trauma Program will provide you with the tools you need to manage motorcycle trauma and make a difference in the care and transportation of the injured rider.

## Program Goal

Our goal is simple. To enhance the survival rate for the injured rider(s) of bicycles, motorcycles, ATV's, mopeds, snowmobiles and other vehicles of similar design and to reduce the potential for rescuer injury.

## Objectives

At the conclusion of the program the participant shall:

- 1) Identify motorcycle parts; including the associated hazards and injury potential.
- 2) Explain two principles for crowd management.
- 3) Identify treatment modalities for environmental hazards including hypothermia and burn injuries.
- 4) Identify and manage traumatic, life-threatening injuries.
- 5) List the steps for assessment and treatment of all types of injuries.
- 6) List the steps to immobilize the entire body from the standing and supine positions.
- 7) List when and how to remove a helmet.

**Who should attend?** All levels of EMS providers, RN's, firefighters, Law Enforcement, Chiropractors and Emergency Department personnel.

## Program Information:

- Registration opens at 8:00 am
- Class will start at 8:30 am
- Class concludes at 4:00 pm
- Refreshments and lunch shall be provided by program sponsors.

## Faculty:

### Wayne Wierson

In 2005 Wayne joined the Two Wheel Trauma family and presents ABATE's Share the Road (STR) at every program. His enthusiastic presentation style captivates the audience and leaves them in awe of his inspiring message. He is a true advocate for safe roads and has testified in Washington DC. Wayne is the former State Coordinator for ABATE of Iowa's STR program.

### **Dick "Slider" Gilmore, EMT-I (retired)**

Slider's first motorcycle ride in 1960 ignited a permanent obsession for riding on the open road and a lifestyle dedicated to hard work, family and serving others. For nearly 25 years he served as a volunteer EMT and CPR instructor and provided support for EMT's suffering from critical incident stress. In appreciation for improving the image of motorcycling and presenting the Accident Scene Management course to thousands of bikers worldwide, he has received many local and national awards. Most recently he accepted the prestigious John "Farmer" Eggers award.

### **Anita J. Bailey, Paramedic (retired)**

Anita has worked in EMS since 1977 as a field provider, educator, administrator and author. She recently retired after serving Iowans as a regional EMS coordinator for the Bureau of EMS for 19 years. Anita was inducted into the Iowa EMS Association Hall of Fame in 2016. She remains passionate about fighting sudden death, building EMS systems for the future and is committed to excellence in EMS.

### **Frank J. Prowant, PS**

Frank has extensive experience as an EMS provider and administrator since 1977. He continues to develop and present cutting-edge EMS educational programs and inspires students to be technically competent and compassionate providers. Frank uses his leadership expertise as the Deputy Chief for the Ankeny Fire Department in Ankeny, Iowa. Frank is well-known and well-respected as an industry leader that champions for all patients.
