## Observe 3 Partnerships

### Augustana College Lead Project

Augustana College and Scott County Health Department are taking a step together to approach childhood lead poisoning in the community. Together, we will stop lead from compromising the health and well-being of local children.

### Center for Alcohol & Drug Services, Inc.

Scott County is taking a step with Center for Alcohol & Drug Services, Inc. (CADS) to address alcohol and drug use habits of inmates in the Scott County Jail. Together, the partnership identifies and offers eligible inmates an eight-week evidence-based behavior therapy program. After an inmate leaves the jail, follow up care is provided by CADS. As a result, inmates are less likely to return to the jail and have better success returning to the community.

### Childcare Centers

Stepping with several community partners, the Scott County Health Department provides support services for child care centers, home daycare providers, and preschools in Scott County. Together, we are dedicated to ensure a safe and healthy environment for all children.
