Foodborne Illness Prevention

A Step Towards Prevention

Observe 3 Prevention Measures

Tobacco and Nicotine Free

Scott County Health Department works to educate the community on the effects of tobacco, supports businesses who wish to strengthen tobacco policies and provides people with options to quit using tobacco with Quitline Iowa. Two of this program's goals is to prevent the initiation of tobacco use among young people and eliminate exposure to secondhand smoke.

I-Smile™ and I-Smile™ Silver

I-Smile™ and I-Smile™ Silver take steps to educate the community about oral health. The health department provides care coordination to address oral health needs and barriers to dental care, dental referrals, and oral health education. The overall goal for both I-Smile programs is to connect children, families, and older adults to dental care.

Foodborne Illness Prevention

Serving safe food requires knowledge and good practices. The Scott County Health Department visits all fairs, festivals, and special events to ensure food vendors take the right steps to prevent foodborne illness. We work hard so community members can enjoy good food and times without worries.
